

Role: Intern Analyst

Title: Intern Analyst

Qualifications: 2nd Year+ undergraduate or Masters – Finance / Economics / Engineering / Innovation

Required experience: 3-5 months' minimum relevant work experience

Length of internship: 3 months (€1000K per month)

Location: Berlin

Application process: When applying please share a copy of your CV, along with (in place of a cover letter) a short summary of a start-up (no more than 1 side A4) that you find interesting and why. The start-up selected must match the following criteria:

1. **Sector:** Supply Chain (maritime, logistics, transportation)
2. **Size:** Seed - Less than \$5Million raised to date

Who we are

Amplifier - innovation unit and venture capital investor.

Spun out of the shipping industry, Amplifier approaches the supply chain as an interconnected ecosystem, investing from deep ocean to last mile into disruptive maritime, logistics and mobility tech.

Targeting companies at the Seed and Series A stage, with strong differentiation from existing market solutions, global reach and scalable business models as well as an excellent team with a successful track record.

Our vision is to see the shipping industry adopt new technology, create new operational models and find disruptive growth routes across the supply chain, sustaining and leveraging its position at the centre of global trade.

Our culture

We, Amplifier, are a small team of 5, engaged with some of the world's leading technologies in the logistics and maritime markets. We move fast and stay flexible, giving everyone the opportunity to work on a variety of projects. Thriving on uncertainty.

You will need to be as comfortable working with some of the largest corporates in the world, as well as small cutting-edge start-ups.

Your responsibilities

- Market research to support investment analysts
- Map existing trends and emerging technologies
- Competitor intelligence for incoming investment opportunities

Our ideal candidate

- Highly engaged with the start-up world, technology and innovation
- Outstanding motivation and intellectually curious
- Interest in supply chain and maritime technology
- Analytical and detail orientated
- Self-starter who enjoys working in an unstructured, fluid office environment

- Excellent communication and listening skills

Must-haves

- Fluent in English (Bi-lingual preferable - GER)
- High numerical competency (financial report analysis)
- Basic understanding of business strategy / financial modelling
- Topline understanding of the logistics, shipping, energy or mobility markets
- MS Office, especially Excel, PPT
